

SUPPORTING U.S. BUSINESSES IN THE ARABIAN GULF

KUWAIT, OMAN, QATAR AND UNITED ARAB EMIRATES

With a combined GDP of \$825 billion across Kuwait, Oman, Qatar, and the United Arab Emirates (UAE), the Arabian Gulf as a region represents one of the highest potential export markets for U.S. firms. With a world-class oil and gas sector and national plans for diversification, best prospects exist in numerous industry sectors, including oil and gas, infrastructure, information and communication technology, advanced manufacturing, aerospace and defense, cybersecurity, healthcare, and environmental technologies. The Arabian Gulf is also well-positioned for exploring opportunities beyond the Middle East due to its strategic geographic location within an 8-hour flight of two-thirds of the world's population.
